BULLETIN

-time lapse imaging trial-

Dear TILT Team,

Here it is folks, the highly anticipated second TILT Bulletin! In the very real battle against DSAS (Difficult Second Album Syndrome), we hope our effort goes more the way of Nirvana's critically acclaimed Nevermind than Bon Jovi's utterly forgettable 7800 Fahrenheit (if you've never listened to it before, it's better to keep it that way).

STUDY UPDATES

1. Homerton are currently undergoing their first round of **self-monitoring**. Thank you for all the hard work going into this.
2. The first **Trial Steering** and **Data Monitoring Committee** meeting in September was a success and provided the Trial management Group with useful insights.
4. For the first time ever in the history of Clinical Trials*, **August** was the busiest month in terms of recruitment, with **33 participants recruited and 23 randomised**.
3. As of today (8th October 2018) there have been 78 participants recruited and 54 randomised.
4. **Bath Fertility Centre** had their SIV on 1st October and will be recruiting very soon.
5. We will also be welcoming **Hammersmith Hospital** to the TILT family in the near future.

*Author has been known to exaggerate in the past.

Meet the team – James Heighway

James is the Data Assistant at Barts Research Centre for Women's Health. He ensures the quality and completeness of the data collected across all of the BARC studies, so you can expect to regularly hear from him throughout the duration of the study. Feel free to say hello!

Email: j.heighway@qmul.ac.uk

Tel.: 020 7882 3272

Thanks again for your continued hard work. Look out for the next bulletin in 2 months time, and in the meantime if you have any burning questions or would like a little more info on anything, don't hesitate to get in touch - details are below.

Dominic Baxter, TILT Trial Coordinator
